

# Specialty Strapping Machines For The Food Industry

EAM-Mosca's stainless-steel strapping machines are designed specifically to meet the rigorous demands of the food processing industry.

Our highly durable and reliable range of stainless-steel strapping machines are the top choice for businesses that prioritize reliability, and cost-effectiveness.

## FEATURES INCLUDE:

- Mosca's proprietary **SoniXs®** ultrasonic sealing head provides superior seal performance in cold, wet environments.
- Highly corrosion-resistant components with a stainless-steel enclosure for increased durability and extended system life.
- Easy and safe cleaning - our system can be hosed down for cleaning and is protected against high-pressure water jets from any direction.

## Durability Meets Reliability

All of Mosca's stainless steel strapping machines meet IP56 rating standards for ultimate durability, reliability, and high performance in demanding food processing environments.

An IP (ingress protection) rating classifies the degree of protection against the intrusion of solid objects, dust, accidental contact, and water in electrical enclosures.

### Solid Protection (5)

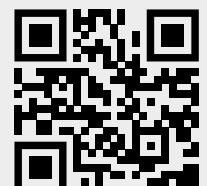

Dust is not entirely prevented, but it will not enter in sufficient quantity to interfere with the satisfactory operation of the equipment; complete protection against contact.

### Liquid Protection (6)

The machine protects from harmful amounts of high-pressure water projected from jets, Providing protection from splashing water, hose-driven water, and corrosion.

The original ROMP4 had accumulated **39,509,574** cycles in **17 years**, averaging an impressive **2.2 million** cycles per year!

## ROMP-6-VA SoniXs®

The ROMP-6-VA SoniXs® is a bottom seal, operator-cycled strapping machine designed for markets with medium production, up to **50 cycles/minute**.

Operated via a control panel or footswitch, this machine is best suited for closing product containers. It is available with a cylindrical or ball roller table top, and adjustable table height.

### Medium Production

Operator Cycled | Table Top

## ROMP-6R-VA SoniXs®

The ROMP-6R-VA SoniXs® automatic strapping machine can strap up to **40 Units/Minute** and can be integrated into a new or existing end-of-line system.

For maximum production, the optional photo eyes allow products to be strapped automatically when they are sensed within the strapping zone.

### Medium Production

Fully Automatic | Roller Table Top

## ROMS-6-VA SoniXs®

The ROMS-6-VA SoniXs® is side sealing automatic strapping machine that can strap up to **40 Units/Minute**.

The special side seal design prevents falling debris from interfering with the sealing unit, ensuring continued long-term performance.

### Medium Production

Fully Automatic | Side Sealer

## Integration Capabilities

At EAM-Mosca, we support a wide range of applications. We can integrate our products into most situations with our wide range of strapping and stretch wrapping systems.

Our capabilities include designing integrated controls when appropriate and supporting broader-based system integrators as needed. We aim to provide our customers with productive and economically justifiable solutions for their end-of-line packaging needs.

## The Complete Mosca System

- + Spare Parts
- + PP & PET Strapping Material
- + Technical Support, Training Programs & Comprehensive Service Network
