

Signature Log Strapping Machine

MOSCA®
EAMMOSCA

- High Performance Sonixs Technology
- Reliable, Low Maintenance Bundling
- Roller Mounted for Easy Access
- Integrates with Most Vertical Log Stackers
- Uses PET or PP Strapping

SONIXS

Available with Sonixs Technology

Innovative Strapping Systems

Signature Log

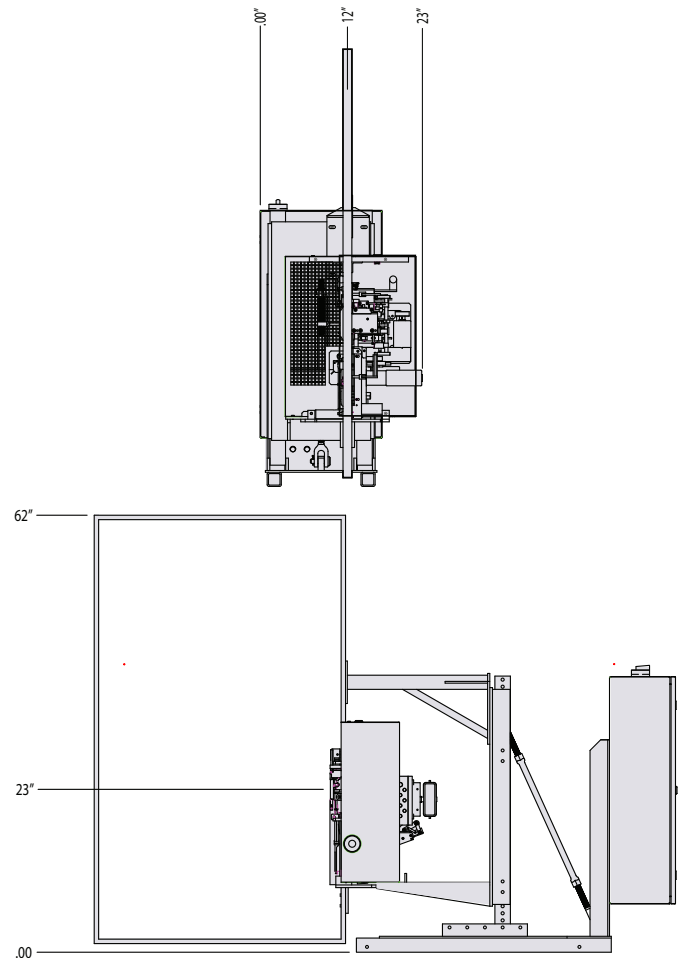

Standard Features

The Sonixs Signature Log Strapping System from EAM-Mosca is a very reliable automatic plastic strapping system that integrates with stackers from major manufacturers to optimize signature bundling. The system helps to minimize maintenance and storage costs and improves product quality and appearance. The carriage mounted strapping head and strap track system rolls into the stacker providing convenient access for both operating and service positions. Dispenser is floor mounted. Machine height and track size can be customized for your application needs.

- The adjustable seal height and head angle enables on-site adaption to meet stacker requirements. Our narrow track width (2.24") fits conveniently between conveyor and signature support rolls. Variable size strap tracks are available to meet your application needs.
- The Sonixs strapping head utilizes ultra-sonic sealing technology to make reliable seals, efficiently, with no smoke or plastic buildup, on either Polyester or Polypropylene strap. Its lever actuated gripping and cutting system is an open design that sheds dirt and dust while its sealed bearings limit normal service to occasionally blowing out any dust buildup.
- The Signature Log Strapping System can use 11mm (7/16") or 12mm (1/2") Machine Grade Polyester or Polypropylene Strapping.
- The Sonixs head weighs an easy-to-handle 65 pounds and has a modular drop-in mounting system with plug-in electrical connections.
- An optional out-of-strap sensor indicates need for coil change.
- Flexibly mounted operator controls may be located for operator convenience at time of installation.
- The system features a roller mounted carriage for convenient service and maintenance access.
- EAM-Mosca offers knowledgeable technical support, readily available from our network of service technicians, strategically located throughout our service area. We provide system installation and offer in-plant training for your technical and maintenance staff. We also offer equipment warranty and spare parts delivery services. For additional information, visit our website at www.eammosca.com or call us for more information.

Technical Data

- Cycle Rate:** 12 seconds/strap
Strapping: 11mm or 12mm Machine Grade PET or PP
Track Size: Variable to suit application
Electrical: 230V or 460V, 3 Ph, 60 Hz, or optional 575V, 3 Ph, 60 Hz.
Air Requirements: No requirement
Strap Tension: Up to 250 Lbs.
Strapping Head: Mosca Sonixs
Strap Seal: Ultra Sonic
Machine Color: Mosca Blue RAL 5010
Machine Shipping Weight: Depending upon model, approx. 750 Lbs. on pallet
Casters: Heavy-duty, two swivel-lock and two fixed
Options:
- Dual Reel Strap Dispenser
 - Out of Strap Sensor
