S-ATRS-6 SoniXs

FULLY AUTOMATIC SQUARING BUNDLER

The S-ATRS-6 SoniXs® strapping machine automatically squares and straps operator formed bundles from shingled-stream cartons exiting specialty folder gluers and features an air table operator station with a side squaring guide. This machine is specifically for difficult-to-stack products that require compensated stacking, providing a more square bundle going into the strapper.

The Ultimate Strap Sealing Solution

Mosca's proprietary SoniXs® ultrasonic sealing heads have revolutionized strapping systems offering significant and proven advantages over traditional heat-seal technologies, including cost, maintenance, and longevity across all industries and applications.

Unlike heat seal systems, SoniXs® strap seals are made without the use of high-temperature components, reducing energy costs, improving safety, and generating lower emissions.

A SoniXs® seal is harder to break, and the visible evidence of a break is irreversible. The distinctive impression on Mosca's ultrasonically-sealed strap makes it easy to identify if the packaging has been tampered with. The seal will be distinguishably different if a strap is removed and reapplied.
