ROMS-6 SoniXs

FULLY AUTOMATIC SIDE SEALING STRAPPING MACHINE FOR BUNDLING, CLOSING & SECURING APPLICATIONS

The versatility of the ROMS-6 SoniXs® design makes it an excellent choice for a wide variety of applications, from protective packaging and furniture to door and window products and more. Its unique side seal design keeps the strap track free from falling debris that can affect machine performance.

The Ultimate Strap Sealing Solution

Mosca's proprietary SoniXs® ultrasonic sealing heads have revolutionized strapping systems offering significant and proven advantages over traditional heat-seal technologies, including cost, maintenance, and longevity across all industries and applications.

Unlike heat seal systems, SoniXs® strap seals are made without the use of high-temperature components, reducing energy costs, improving safety, and generating lower emissions.

A SoniXs® seal is harder to break, and the visible evidence of a break is irreversible. The distinctive impression on Mosca's ultrasonically-sealed strap makes it easy to identify if the packaging has been tampered with. The seal will be distinguishably different if a strap is removed and reapplied.
